** As determined by C&BCo

¹ Effectiveness with a coated or lined reverse

² Widths over 5000mm must be centre opening

³ Fullness reduced to 180% for double S-folds

PRODUCT CARE ADVICE

Regular care will minimise the need for additional cleaning. To vacuum, work from the curtain top to bottom making sure the vacuum is set to a low power mode. Lightly shaking your curtains will help reduce dust build-up. Always exercise caution when spot cleaning. Test clean on non-exposed area. Use a clean damp sponge to first blot the mark or stain, then gently dab the affected area with dish soap or white vinegar. Avoid excessive rubbing or abrasion. Steam cleaning is suitable for most curtain fabrics. Work from the curtain top to the bottom, ensuring the fabric does not become overly damp. Wet curtains place a greater load on curtain fixings which may result in damage. Due to the risk of damage, C&BCo is not able to replace products that are adversely affected by steam cleaning. Washing is not recommend for our curtains due to an expected shrinkage of 3% per wash. If you do wish to wash your curtains, consider a professional washing or dry-cleaning service (if appropriate for your fabric type). Before any type of washing, please contact the C&BCo to obtain the fabric supplier's care instructions. Due to the risk of shrinkage, C&BCo is not able to replace products adversely affected by washing.
